

## Perfect protection by PP spunbonded non-woven fabrics

### Our Company

We are one of the largest manufacturers of PP Spun Bonded Non Woven Fabric in India. We have good production Capacity of 6000 MT per annum with Double Beam Technology from 10 GSM to 150 GSM Material in all color with various width. We also manufacture variety of Laminated Non Woven Fabric. **Karam Multipack Pvt. Ltd.** has imported 3.2 Mtr. Double beam technology and is now gaining more popularity as a brand. We source our material from authentic suppliers and test them on various parameters before use. The entire production Process is carried in our state of art production unit, and each stage is managed continually by our team of quality control experts.

All energies are concentrated towards producing Pollution free non woven fabrics to our customers' satisfaction.

Quality of **Karam Multipack Pvt Ltd** non woven Fabric is technology driven:

Complete process controls with quality checks attach stage of Operation from unloading of raw material to delivery of goods.

Scientific color matching.

### Product Range :

Non - Woven Fabrics

PP/PE Laminated Non - Woven Fabrics

Tubular Raffia Laminated Non - Woven Fabrics

BOPP Laminated Non-Woven Fabrics

Weed control Non-Woven Fabrics

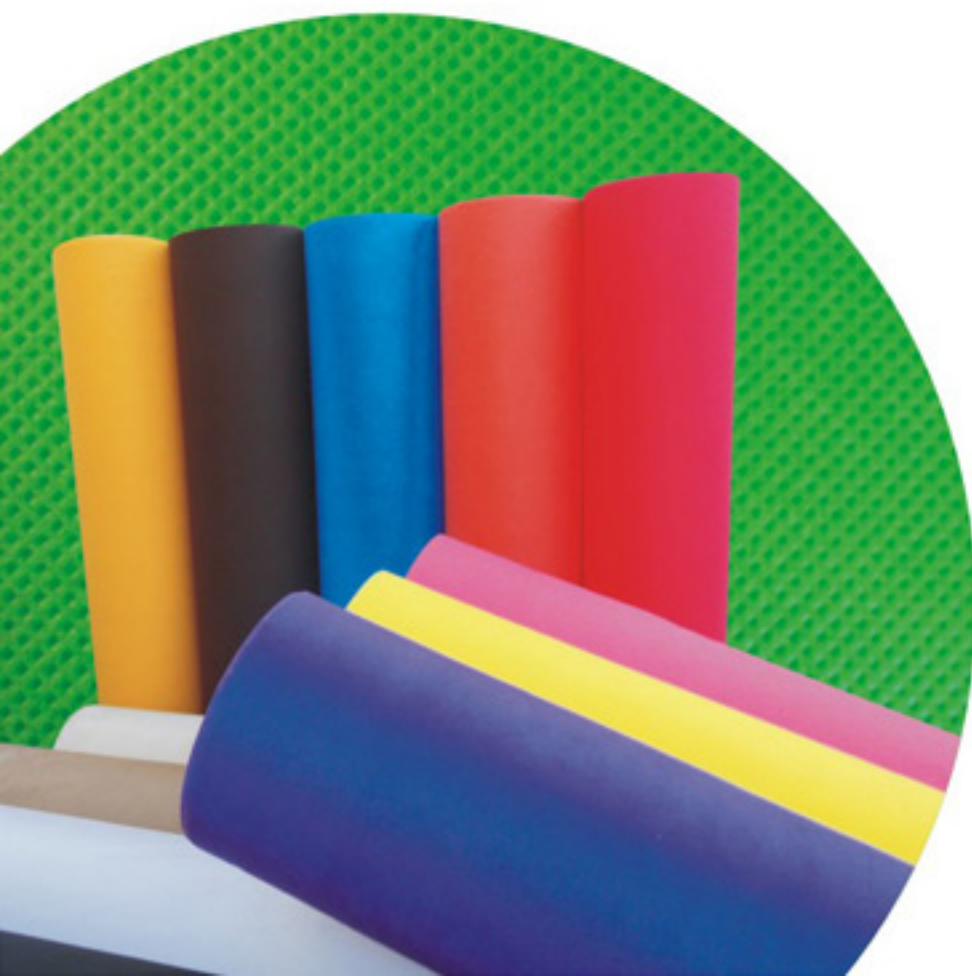

UV Treated Non-Woven Fabrics

**KARAM** is an internationally renowned private group that specializes in the production of PP SPUNBONDED NONWOVEN FABRICS in 1.6 mtr. and 3.2 mtr. width with double beam technology first time in India with strategic products in the Hygiene, Medical, Industrial, wiping, Microfiber and Composite Materials sectors. Using Polypropylene polymer and other engineering polymers, **KARAM** is able to offer and extensive range of modern, technologically advanced nonwovens, such as spunbonds and laminated with other products.

As a global player, **KARAM** continues to invest considerable financial resources in state of the-art technologies and R&D. With diversified production units that are strategically placed near major markets or consumers of our products; we are able to provide them with cutting-edge non-wovens and a highquality service at competitive prices.

At **KARAM**, customers are the focus of our attention and solutions. We innovate and develop new products, investing in the long term, as partners to our customers.

PP Spunbonded Non-woven Fabrics are produced using a precise extrusion-based technology. The polymer is stretched and loosely spread onto a continuous filament and onto a conveyor belt to form the web. Air is used to form and lay the fabric filaments.
